CDISC Capabilities

As the leader in the electronic transformation of Clinical R&D, Octagon Research Solutions, Inc. provides a unique suite of offerings that will facilitate the implementation of **CDISC data standards**, particularly CDISC SDTM (Study Data Tabulation Model) for electronic regulatory submissions.

Octagon's rich portfolio of CDISC services and products enables organizations to leverage our practical experience from numerous CDISC standards implementation, training and conversion projects. We continue to lead the industry in submission and data standards and our skilled team provides guidance, training and knowledge transfer throughout all of our engagements.

CDISC Legacy Data Conversion/Warehousing

Octagon's Legacy Data Conversion and Warehousing services enable clients to implement the SDTM data standard by addressing the complex mapping and conversion activities associated with legacy data. As data standards are implemented, organizations can take advantage of our data warehousing expertise to develop data lifecycle strategies that maximize access to, and analysis of, electronic clinical data.

TurningPoint™ Capability Assessment and Roadmap for Data Standards Implementation

Octagon's expert consultants assist clients in identifying goals, determining requirements and developing implementation strategies for data standards. Capability assessments and roadmap activities facilitate a thorough, well-planned approach to implementing electronic data standards across the organization.

Implementation Assistance

As organizations gain experience with the benefits and challenges of implementing data standards, complex scenarios often emerge that require specific expertise. Our expert consultants provide the domain experience required to address these scenarios and lead the organization to success.

CDISC Training

Octagon is a CDISC Corporate Sponsor, a CDISC Registered Solution Provider and certified trainer for SDTM. As the CDISC organization's certified CDISC trainer we have conducted public and private courses around the world.

Metadata Registry

Octagon facilitates the implementation, compliant use and maintenance of these standards through the **ViewPoint® Metadata Registry**. ViewPoint's Metadata Registry enables consistent use of metadata across global organizations, across the data lifecycle and throughout complex processes. It supports accessible, reusable standards that can be efficiently developed, deployed, managed and retired while minimizing rework, manual maintenance tasks and miscommunications.
